

All in One Smart Solar Street Light - **ST43**

 IP65

200lm/W

10W/20W/30W

All in one design

Integrated with solar panel, battery, controller and sensor, easy to install, no need for wiring, brings light to areas without access to electric grid.

Product advantages

- LiFePO4 battery, high temperature resistance, large current discharge, life cycle more than 2000 times.
- Mono-crystalline silicon panel with 21% conversion rate, which is 30% higher compared to traditional solar panel.

Intelligent control

Integrated motion detection allows for unique possibility to set lighting schedule based on your specific preferences at different times during the night.

Different Mounting Options

Application
